

**PROJECT SUMMARY**

Bayview Industrial Services, Inc. (BIS) continues to expand the industrial cleaning and Ship Service lines throughout Northern California. Our latest project for Mare Island Dry Dock aboard the USCG Polar Star has provided an opportunity to manage several aspects of our service lines. Providing confined space entry operations to perform high pressure tank cleaning, surface decontamination, bulk liquid maintenance and site control measures over the last five months as needed. This project utilizes a wide variety of training and procedures to complete and is the fourth time Bayview has been selected to work aboard this vessel in recent years. In addition to this operation, BIS has also been contracted for two other USCG vessels and a number of other ship service based operations that parallel the services on the USCG Polar Star.
